The Department of Rehabilitation and Regenerative Medicine of Columbia University is pleased to announce a new Pediatric Rehabilitation Medicine Fellowship.

This fellowship is based at Columbia University Medical Center and at Blythedale Children’s Hospital, in Valhalla, NY, and may include clinical rotations at other affiliated institutions. The department plans to apply for accreditation by the ACGME with the goal that fellowship graduates will be eligible to sit for the American Board Physical Medicine and Rehabilitation (ABPM&R) Pediatric Rehabilitation Medicine subspecialty examination. This fellowship provides the trainee with a well-rounded clinical experience in the outpatient and hospital consultation setting at Morgan Stanley Children’s Hospital of NYPH/Columbia University Medical Center and in the Inpatient and Day Hospital setting at Blythedale Children’s Hospital.

Morgan Stanley Children’s Hospital of NYPH is the highest ranked children’s hospital in the US News ratings in the New York Metro area with a 250 bed tertiary care hospital with a full array of specialized services and facilities. Blythedale Children’s Hospital is an 86 bed specialty children’s hospital dedicated to children with complex medical illnesses and rehabilitation conditions. Blythedale is one of only 19 pediatric specialty hospitals in the United States, and has the combined staff, expertise and resources – including the largest pediatric therapy department in New York State, for medically complex children. Blythedale has an Acquired Brain Injury Program, post-NICU/PICU program and K-12 public school district on site.

The fellow will be supervised by five attending Pediatric physiatrists at these two hospitals to provide outpatient and inpatient care for children and adolescents with acquired and congenital disabilities and injuries including cerebral palsy, neuromuscular diseases, spina bifida, arthrogryposis, spinal cord injury, brain injury, brain tumors, and chronic pain syndrome as well as procedures related to spasticity management. The fellow will participate in interdisciplinary inpatient and outpatient clinics during their training and research activities with mentor(s) at Columbia University Medical Center.
